RE: "Cultural Resource Summary for Bill Barrett Corporation's Tavaputs Plateau
Exploratory Drilling Program in Carbon County, Utah"

In Reply Please Refer to Case No. 03-1124

Dear Patrick:

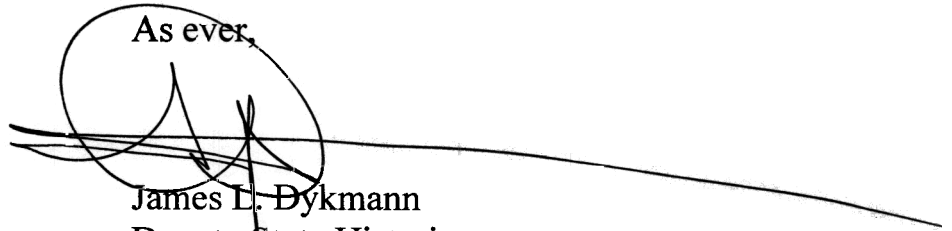

The Utah State Historic Preservation Office received the referenced information on June 15, 2004. After consideration of the consultation request in behalf of the Bureau of Land Management, the Utah Preservation Office provides the following comments per §36CFR800.

Section 106 Comments, Summary Report Consultation:

- 1. Undertaking:** in past consultation with BLM, USHPO advised that the area of potential impact appears to be segmented by land ownership and type of undertaking. Our office advised that all portions of the lands and types of projects be considered as part of the undertaking. This summary report expands the initial area of potential impact and USHPO assumes that this report reflects all of the applications by Barrett Corporation for work in the Nine Mile Canyon area.

2. **Identification:** USHPO recommends to BLM that the Montgomery survey and testing reports meet SOI Standards for Identification.
3. **Eligibility:** USHPO concurs with the determinations of eligibility made by BLM for the described undertaking. The eligibility determinations are outlined in Tables 1-4 in the overview. [NP 21 DOE 134].
4. **Effect:** USHPO concurs with a determination of No Adverse Effect with the following conditions: An archaeological monitoring plan be developed for construction of all phases of the plan. As the undertaking changes, interested parties, including USHPO, will be notified of the changes in the plan.

This information is provided on request to assist with Section 106 responsibilities as specified in §36CFR800. My email address is: jdykman@utah.gov

As ever,

James L. Dykman
Deputy State Historic
Preservation Officer - Archaeology
